

VISION

To be the leading National Podiatry Group for best practice, high quality professional development and research in the management of people at high risk of lower limb amputation.

MISSION

The APP-HRF Group recognises and supports podiatrists as key healthcare professionals in the design, monitoring and delivery of high-risk-foot services. The Group advocates benchmarking and competency in pursuit of limb preservation.

Core Values

Expertise and leadership
Professionalism
Integrity
Collaboration

Core Business

To prevent non-traumatic lower extremity amputations by:

1. Promoting and supporting evidence-based, ethical podiatric practice
2. Promoting and providing excellence in professional learning and skill development
3. Promoting and encouraging collaboration, research and relevant post-graduate education.
4. Facilitating translation of relevant scientific and clinical advances
5. Advocating for Credentialing and Registration endorsement by the Podiatry Board of Australia in the interests of public safety. Eligible Podiatrists would be highly skilled, experienced and considered expert in the management of people at high risk of lower limb amputation.
6. Mentoring the next generation of skilled Podiatrists to be the future podiatric leaders of lower limb preservation.
7. Engaging and working with other organisations and Government, providing expert advice and advocating for health policies
8. Supporting open exchange of knowledge among members and promoting networking with other health practitioners, academics and scientists.
9. To adopt/endorse position statements and guidelines and maintain currency of high standards.
