minute walk away.**

Dr Sarah Aitken is a vascular and endovascular surgeon at Strathfield Private and Concord Repatriation General Hospital, and a clinical academic at the University of Sydney. Her clinical practice is varied, with a special interest around minimally invasive treatment options for vascular disease. She is passionate about improving surgical outcomes, with a focus upon ensuring that patients' concerns and needs remain central to clinical care. Dr Aitken offers a wide range of arterial interventions including open and endovascular surgery, as well as venous operations such as laser varicose vein surgery and injection sclerotherapy. She is actively involved in clinical research especially related to the care of older patients with significant vascular disease.

Dr Aitken has been awarded a number of prestigious research grants, including the inaugural Royal Australian College of Surgeons Senior Lecturer Fellowship, has presented at numerous international conferences and serves on many committees with a focus on improving vascular surgical care.

Vanessa Nube has over 20 years' experience in the management of diabetic foot disease. She has a masters by research and management and project management qualifications. She has published several peer reviewed articles and was the clinical lead for Agency of Clinical Innovation's Standards for High Risk Foot Services and is a member of the National Association of Diabetes Centres, High Risk Foot Accreditation Working Group and an assessor for HRFS Standards by the NADC. Vanessa is passionate about optimising services for people with diabetes and foot complications and the Director of Podiatry for Sydney Local Health District.
